Tested Seeds

Paul H. Baermann Seed Co.
504 VLIET STREET MILWAUKEE, WIS.

D. N. Shoemaker

MAR 5 1925

We present our sixth annual price list with our best wishes for a happy and prosperous New Year.

Our many years experience in the seed business enables us to secure the best varieties from seed growers with the highest reputations for quality in this country and abroad.

We do not attempt to compete in price with inferior stocks offered by some firms under the same name, for any gardener can understand that the cost of raising a field of carefully rogued and selected seeds is greater than a field of cheaper seeds not requiring as much attention. Naturally the seed growers prices to us are a bit higher for the better stocks. You will find our prices very reasonable, however, for the quality of seed offered.

The first cost of seed is but a small item compared to the cost of land, labor, time and all other attentions a crop needs before maturity. If the crop is not as good as it should be and the seed is at fault, you can readily see that the small difference in the first cost of the seed is only a very small part of the loss sustained.

The most important factor to a gardener or florist is that the seed has planted should GROW and it certainly would be a big aid to him to know just what PERCENTAGE grows. We test EVERY ITEM in our stock for germination before our orders are filled and we have the actual tests to show for reference at any time.

Many new varieties and improvements and selections on old strains are listed this year which every gardener ought to try and which may prove real money makers because of their earliness or other good qualities. These new varieties with only a few exceptions were tried out in field tests a year before offering them to the trade as better stocks. NEW STOCKS AND THE BETTER VARIETIES ARE PRINTED IN HEAVIER TYPE IN THIS LIST.

Weather conditions during 1924 growing season were very poor as all gardeners in this vicinity know. Seed growing sections also suffered heavy losses, getting too much rain in some localities and not enough in others and the early frosts killing many seed crops not only in this country but abroad, the source of much of our seed. We are getting one-half our contracted amount on some varieties and anticipate being sold out on many items before the season is over. Naturally prices have advanced a little because of this reason. Kindly place your order as early as possible, to insure quicker service.

TESTED SEEDS

All orders taken previous to the issuing of this list, if some of the prices are higher, will be lowered to meet prices in this catalogue. If prices already booked, are lower, they will remain as accepted.

Write all orders on blank enclosed and use envelope, writing your return address thereon. We will send all orders of reasonable weight for Garden and Flower seed by Parcel Post, the postage charges paid by us (except Beans, Sweet Corn and Peas).

Seamless Cotton Bags charged extra at cost where required for packing or shipping.

As customary with all American seed houses we can not GUARANTEE results or crops, due to poor weather conditions, improper care at time of planting or cultivation, damage done by insect pests, and all other causes beyond our control.

NON WARRANTY—"We give no warranty express or implied as to description, quality, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out and will not in any way be responsible for the crop."

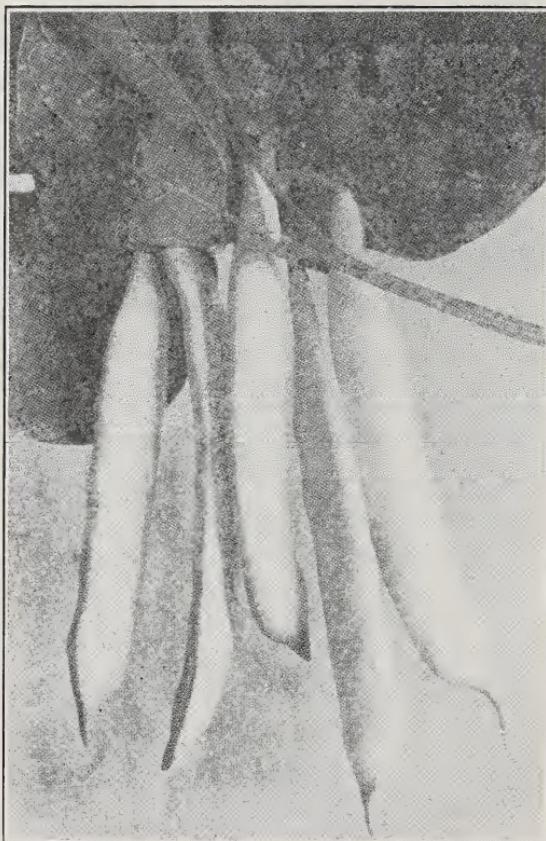

Although if there is any cause for complaint, we will determine the cause and replace the seed free of charge if it is at fault.

SWEET PEAS**New Early Flowering Spencer—**

We have a very superior stock of this most important item for the florist. We buy only the carefully selected strains from the best growers of Sweet Peas who has repeatedly won Gold Medals or other high honors in the National Flower Shows. Many varieties listed under the "old reliable" names are in reality new improved stocks carefully selected.

TRY THESE NEW NOVELTIES $\frac{1}{4}$ oz. 1 oz.

EARLY ELDORADO —(New) A pure orange salmon; early everblooming, of robust vigorous habit. Practically sunproof, does not require shading. Better than any other so-called orange varieties.....	\$1.00	\$3.50		
EARLY FLAMBEAU —(New) A large orange cerise. It is a pure orange slightly tinted with cerise, very large and free flowering and will not burn.....	1.00	3.50		
EARLY NEW BLUE —A deep blue introduced after many years of work to get a perfect stock of this. Of robust habit, free flowering, good stems carrying four of large size.....	1.00	3.50		
Pkt. $\frac{1}{4}$ oz. 1 oz. $\frac{1}{4}$ lb.				
Blanch Ferry, rose pink, white wings.....	\$0.10	\$0.25	\$0.75	\$2.75

MILWAUKEE, - WIS.

BENEFITS OF INOCULATION

The principal reasons for inoculation can be stated in five short paragraphs, viz.:

First—Inoculated legumes take nitrogen from the air to supply the plant, resulting in faster growth, earlier maturity and larger crops.

Second—Inoculated legumes take up more nitrogen than the plant itself requires, the surplus remaining to the benefit of future crops.

Third—Inoculated legumes develop larger root systems than when not inoculated and therefore reach the immense stores of potash and phosphorus in the sub-soil, bringing them up to supply the plant. When the roots and stubble decay these elements are also returned to the soil in a form available for future crops.

Fourth—Inoculated legumes, by taking their nitrogen from the air, save the soil. When not inoculated they drain the soil of its nitrogen just the same as wheat or timothy or other non-leguminous plants.

Inoculated legumes contain more protein matter than when not inoculated, greatly increasing their feeding value.

Summary—Inoculation hastens maturity, increases the crop, improves its quality, enriches the soil and saves fertilizer bills.

NITRAGIN is the original soil inoculator. Sold to farmers for 28 years. Experience is a big asset. Sold to the largest seed houses from coast to coast.

NITRAGIN is one of the highly endorsed products on the World's market. Farmers, Agricultural Colleges, Agricultural Journals, Soil Experts, everywhere testify to its merits.

DIRECTIONS are plainly written on every NITRAGIN label.

You mix NITRAGIN with the seed and plant in the usual way.

Like all really big things, Nitragin has many imitators

Garden Size 20c Why Pay More

Every Garden Needs NITRAGIN

(3 in one) Bacteria Fertilizer for

PEAS, SWEET PEAS and BEANS

Inoculates from one oz. package up to eight pounds seed. Insures a better quality, larger crops and faster growth.

SOLD IN TINS, NOT GLASS

It is safe and reliable. Easy to open and easy to mix with seed. Contents look like a deep rich soil. Contains more nitrogen gathering germs by millions than any jelly culture. When ordering always name the crop you want it for.

Guaranteed for one year. Expiration date is stamped on every package.

Red

E

Power Cultivator

An ideal implement for light plowing, weeding, harrowing and discing in garden or between light row crops

Also hauls light loads, does stationary power work and mows lawns. Uses Planet Jr. wheel hoe and one horse tools. Works straddle or between rows. Does the work of 4 men or one horse. Highly endorsed by prominent Milwaukee County gardeners.

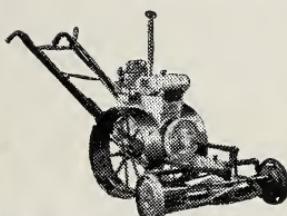

All wearing parts entirely enclosed. All moving parts run in bath of oil. No grease cups. Our own 4 H. P. 4 Cycle, Air-cooled Engine. Has many parts used on well known, low-priced auto. Durable and efficient. Perfect balance permits easy turning at end of rows.

Guaranteed for one year.

RED E Power Cultivator complete with Automatic Steering Device, 26" Tool Bar and pair 8" hoes with 2 Clamps, 2 straight Standards and 2 Tool Holders —

\$275.00 f. o. b. Milwaukee, Wis., Weight 450 lbs.

POWER LAWN MOWER

The **RED E** equipped with our 31-inch Lawn mower is ideal for mowing lawns, parks, cemeteries, estates and golf courses. The mower can be attached in a few moments and once on furnishes an outfit that will take the place of six men with hand machines.

Armour's BIG CROP Fertilizers

Armour's Big Crop Bone Meal 3-27

Guaranteed analysis, 3% ammonia, equivalent to 2.47% nitrogen, and 27% total phosphoric acid. Very good for fall application on lawns, meadows and permanent pastures, also valuable in greenhouses for benching, rose beds, pot and bench plants. It is finely ground and of first quality. Decomposition starts quickly and continues throughout the growing season, improving soil fertility as well as feeding the plants.

Apply 25 lbs. per 1,000 square feet on lawns, 50 lbs. per cubic yard for benching pot plants and roses.

Armour's Big Crop 4-8-6 Fertilizer

For all soils other than muck or peat—a concentrated manure especially prepared for Truck Farms, Home Gardens, Potting Earth and Top Dressing—for asparagus, beans, beets, peas, carrots, cabbage, cucumbers, onions, tomatoes, potatoes, strawberries, etc. Apply 300 to 800 lbs. per acre. Use 50 lbs. per cubic yard for potting earth and scatter 20 lbs. per 1,000 square feet for top dressing.

Armour's Big Crop 2-12-6 Fertilizer
A good all around fertilizer for general truck crops especially good for grain, etc., where more phosphate is required and also on muck soils where a little nitrogen is required. Apply 500 to 1,000 pounds per acre.

Armour's Big Crop 0-12-12 Fertilizer

On all muck and peat soils which contain enough nitrogen but lack in phosphate and potash. Very good for all root crops—Radish, Beet, Carrot, Potatoes, etc., also Celery and Asparagus. Apply same as above.

Armour's Nitrate of Soda

Most available and the quickest commercial nitrogen used to force maturity of vegetables and flowers. It should be applied only when the plants are above ground.

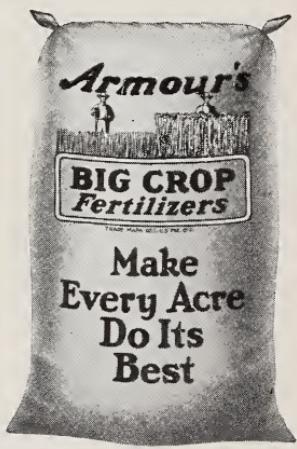

Armour's Muriate of Potash

Imported or domestic Muriate, recommended for all root crops. May be used with Bone Meal and Dried Blood or natural fertilizer—for fruits, celery, asparagus, potatoes, etc. Both above 200 lbs. to bag.

We can supply any quantity on short notice, from a Pound to a Carload, and

Fertilizers Are Plant Food Carriers

Fertilizers are carriers of plant food in an available and concentrated form. They contain the three elements of plant food most needed in crop production—Nitrogen, usually referred to as ammonia; Phosphorus, known to the buyer as phosphoric acid; and Potassium, known as potash. Each of these elements performs definite functions in plant growth.

Why Fertilize Our Crops

The big reason for the growth in the consumption of fertilizers lies in the fact that commercial fertilizers increase profits wherever properly used. Our soils are still being robbed of their available fertility, and consequently, IN MANY CASES, THEY ARE NOT PAYING REASONABLE PROFITS. Fertilizers will help bring these soils back into the money-making class. Fertilizers give crops a good start, hasten maturity, improve quality, and increase yields. Fertilizers pay on rich soils. Do not ignore the plant-food question because your soil produces good yields. It can produce bigger and better crops. Try out available plant-food on your best and poorest soils and see for yourself.

What Plant Food Does

There is no mystery about the action for fertilizers in plant growth. Nitrogen or ammonia, causes quick and vigorous growth of stalk or stem. Available phosphoric acid helps fill the grain or fruit and hastens ripening. Potash strengthens the straw of stalk and helps to plump and fill the grain and fruit.

Manure

Is becoming scarcer every year and will soon be prohibitive in cost, figuring on the basis of the plants food it contains. Intelligent truck growers are turning to ARMOUR'S BIG CROP FERTILIZERS for their plant food. Even if manure is available, acid phosphate and potash must be added to make it a balanced fertilizer. ARMOUR'S BIG CROP FERTILIZERS supply available plant food at the cheapest cost per pound. Ask for free special booklet giving instructions how to use Fertilizer and much valuable information for the truck gardener.

*"Price may get business, but it takes
Quality to hold it."*
